I. DEFINITIONS

A. **Overhaul:** “Overhaul” as referred to herein means performing in accordance with applicable publications; (1) Disassembled, (2) Cleaned, (3) Inspected, (4) Repaired as necessary, (5) Reassembled, and (6) Tested, as authorized in FAR 43.2(a).

B. **Repair:** “Repair” as referred to herein means returning malfunctioning or damaged equipment to a serviceable condition by correcting such malfunctions and/or damage.

C. **Test:** “Test” as referred to herein means testing components in accordance with applicable publications. Such a “Test Only” is only verification or denial of a component meeting or failing test criteria as outlined in appropriate publications.

II. WARRANTY PERIOD

A. **Overhaul:** The warranty for components overhauled at the Company shall be either six (6) months after installation or twelve (12) months after shipment from Company’s facility or one-half (50 percent) of the original equipment manufacturer’s or airframe manufacturer’s recommended TBO/TBC or 500 flight hours, whichever period expires first.

B. **Repair:** The warranty for units repaired at the company is 90 (ninety) days after installation or six (6) months after shipment from the Company’s facility or 100 flight hours whichever period expires first.

C. **Test:** Warranty on units ‘tested’ only is limited to proper operation upon installation on aircraft or six (6) months after shipment from the Company’s facility whichever occurs first.

III. WARRANTY CLAIMS

A. The Company must be notified of any such defect within ten days of discovery and prior to expiration of appropriate warranty period. All warranty work must be performed at the Company. Unit must be returned within thirty (30) days of the Company being notified.

B. Claims must include the Company’s Work Order number (this is found on our Serviceable Tag, top).
